

Easy Plus 200/400/600 Pedestrian Gate Closer

The Easy Plus Pedestrian Gate Closer is a fully featured commercial closer that provides consistent automatic closing without slamming. This gate closer has an adjustable closing speed and a choice of bracket fitting holes giving more control of the gate when closing.

Mounted on the gate surface, the Easy Plus Pedestrian Gate Closer is suitable for retrofitting to existing gates and for fitting to new gates at the time of fabrication.

Each gate closer kit includes a closer, brackets, fitting bar, and instructions. Fixings are not included as they vary according to the gate and post specification.

Ongoing maintenance is limited to regular inspection and lubrication.

Closing speed is adjusted by turning a hexagon headed screw located on one eyelet.

As with all gate closers of this type, it is advisable to fit a 'stop' *restricting the opening angle to avoid damage to the closer.

Quick overview:

| | |
|-------------------------|--------------------------|
| Closer material | Bright zinc plated steel |
| Closer colour | Silver |
| Hinge arrangements | In-line & Offset |
