

Rimlock for Gates & Garage Doors

This simple, highly robust long throw rimlock is suitable for both timber gates and garage doors. It has been designed to be easily fitted by any DIY enthusiast.

The lock comes in two models:

(A) Key lockable from both sides of gate

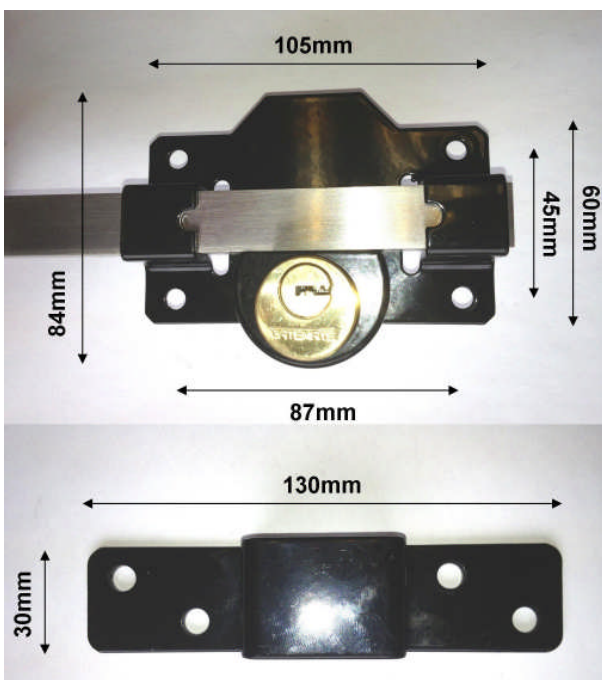

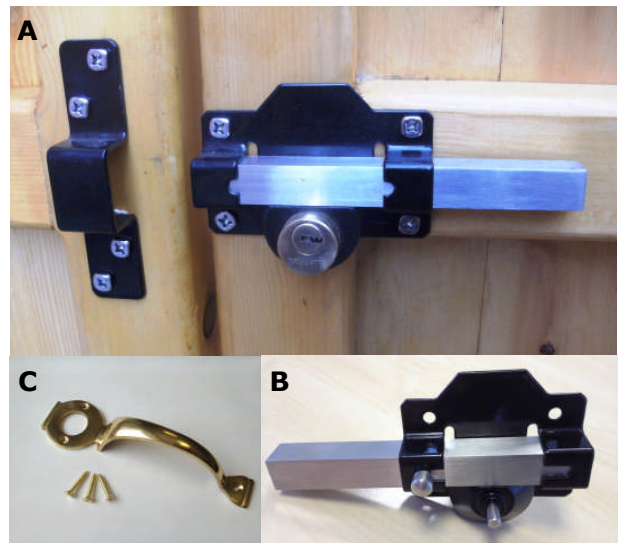

(B) Key lockable from outside with manual spring latch on the inside.

Both models can be fitted to gates of between 50 and 70 mm thick.

The barrel lock is 6 pin and supplied with 5 keys.

We also have available a brass pull handle **(C)** with an integrated escutcheon hole.

This product can be keyed alike upon request.
