

THE GATE CLOSER SPECIALISTS

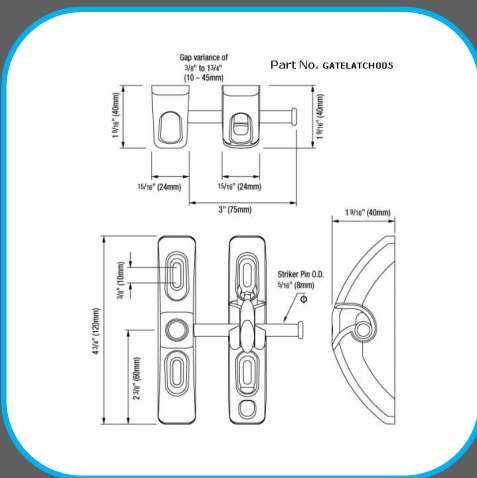

T-Latch Gate Latch

At last there's a general-purpose gate latch designed to replace conventional metal gravity latches.

The new T-Latch toggle-action gate latch is remarkably simple and effective. The pivot-style latch bolt toggles vertically to automatically accommodate gate sag and ground movement.

The latch can also be adjusted separately for additional vertical and horizontal adjustment, making it arguable the most adjustable entry-level gate latch in the world. In addition to adjustability, superior strength and a Limited Lifetime Warranty, T-Latch is lockable and provides a padlock storage feature – all at a very competitive price.

T-Latch's ultra-strong, engineering polymer latch housings and stainless steel latch bolt and components mean the latch will not rust, bind, chip, fade or stain!

INNOVATIVE & RELIABLE
GATE PRODUCTS

Technical Overview:

Padlock Storage Feature
